Subject: Trash Disposal Request
Date: Tuesday, April 16, 2019 2:15:20 PM

To whom it may concern,

As you are aware, we are approaching the 5th week of this emergency response without an approved Waste Management Plan (WMP). Consequently, ITC is experiencing a significant accumulation of waste storage containers on site that are awaiting disposal. Several of these containers hold general trash, including food waste. As we have been unable to begin disposal of waste without an approved Waste Management Plan, the storage of food waste, and other general trash products is becoming an issue of sanitation.

ITC requests that we be allowed to dispose of the general trash containers to help alleviate any health and safety issues they may be causing while the WMP is still under consideration. These are existing waste streams that have been historically used at the facility. The wastes will be classified as Class 1 nonhazardous and will be handled under ITC's normal waste profile via existing vendors.

Thank you for your consideration.
